

## Miscellaneous Inspection Notes

1. All new developments will be required to hire a soil engineer who will certify that all roadways are constructed in accordance with the Village of Mundelein's Specification "Field Quality Control Procedures for Pavement Area Subgrade."
2. Upon completion of all sanitary sewer and storm sewer, the sewer shall be televised and two (2) copies of the digital media (CD/DVD) shall be supplied to the Village.
3. A street light cable inspection is required following the cable duct installation prior to backfill. Contact Village of Mundelein Engineering Department for scheduling.
4. Pre-construction meetings shall be arranged through the Village of Mundelein Engineering Department.
